

COVID-19 SOP PRACTICES

COVID-19 SCREENING TEST (2ND BATCH)

COVID-19 Know The Facts

World Health Organization
Western Pacific Region

COVID-19 spreads primarily from person to person

- Droplets released when someone sick sneezes or coughs can land on the mouths or noses of people nearby
- Close contact with someone sick – like hugging or shaking hands

COVID-19 mainly spreads from person to person
But it can also be left on objects and surfaces...

Contaminated items: doorknobs, tissue, laptop and mouse, lift buttons, pens, digital devices.

So if you touch something contaminated and then touch your face or another's face, you might all fall ill.

Reduce your risk of COVID-19

- Clean your hands often
- Cough or sneeze in your bent elbow – not your hands!
- Avoid touching your eyes, nose and mouth
- Limit social gatherings and time spent in crowded places
- Avoid close contact with someone who is sick
- Clean and disinfect frequently touched objects and surfaces

APPRECIATION IS A REFLECTION OF YOU

Just and opportunity to say **"WOW"** and **"THANK YOU"** for the Great Job as you managed to handle the situation and able to follow the COVID-19 SOP accordingly. GOOD JOB!
